

KEEP A LOOKOUT FOR INVASIVE PLANTS

Kudzu can grow up to 12 inches in a day.

Multiflora rose can produce 17,500 seeds per year.

Japanese privet can grow up to 3 feet high.

Tree of Heaven produces 325,000 seeds in one year.

Bradford pear can grow 30-60 feet tall.

Japanese Stilt grass produces 5,000 seeds per year.

These plants grow rapidly and produce thousands of seeds which out competes our native plants. Many of these plants also can be toxic to people and animals. Report these plants and learn how to avoid spreading invasive species from the NC Forest Service. Learn more by scanning the QR code shown below.
